

Electronics has the most sales with \$156,905 in total revenue, slightly ahead of Clothing (\$155,580) and Beauty (\$143,515).

The three product categories are very close in performance, with Electronics leading by less than 1% over Clothing. Electronics also had 342 transactions with 849 units sold, while Clothing had slightly more transactions (351) and units (894), indicating that Electronics achieves higher sales through a higher average price per unit.
