```
SELECT
  `Product Category`,
  SUM(`Total Amount`) AS total_sales,
  SUM(`Quantity`) AS total_quantity,
  COUNT(DISTINCT `Transaction ID`) AS transaction_count
FROM
  `retail`.`sales`.`retail_sales_dataset`
WHERE
  `Product Category` IS NOT NULL
GROUP BY
  `Product Category`
ORDER BY
  total_sales DESC
```

Total Sales by Product Category

Source:  Sales by product category

The three product categories are very close in performance, with Electronics leading by less than 1% over Clothing. Electronics also had 342 transactions with 849 units sold, while Clothing had slightly more transactions (351) and units (894), indicating that Electronics achieves higher sales through a higher average price per unit.
